About the Conference

Practical Pearls for Achieving Predictable Success in Your Implant Practice

Synopsis: This course will address common issues encountered when planning, placing and restoring implants in today's practice. Evidence-based answers to common questions will be introduced along with patient presentations highlighting the current trends, techniques and materials used in the restoration of the partially and completely edentulous patients. Participants will leave with many "practical pearls" that can be implemented to improve practice flow and patient outcomes.

Learning Objectives:

- Become familiar with patient assessment systems used in the planning of patients desiring dental implants
- Understand the clinical procedures available for site enhancement and placement of dental implants
- Understand the treatment options and clinical procedures for restoration of the partially and completely edentulous patient
